Double Button Press

Two-Way Communication Device

- Enhances efficiency, streamlines staff coordination and minimizes classroom interruptions
- Enables customized communication between staff and specific groups or roles based on proximity
- Supports both routine and urgent needs—from day-to-day coordination to critical response

Use Case Examples

- Instantly request assistance from the three nearest special needs interventionists to reduce response time
- Discreetly alert the SRO and designated crisis team for fast intervention in potential student altercations
- Empower staff to report suspicious individuals and initiate a soft lockdown if needed

Two-Way Communication with the Office

- Office can send direct requests to teachers, such as student early dismissal
- Reduces overhead announcements and interruptions, contributing to improved learning outcomes
- Enables office-led communication during drills or weather emergencies for fast, clear staff direction

Triple Button Press

Essential Device During Crisis

‘Accurate information saves lives—especially during active shooter events.’

In the event of a crisis, our system immediately alerts 911 with the exact location of the initial threat—helping emergency responders act faster and more effectively.

Live Threat Tracking

Unlike traditional systems, our device can actively track a shooter’s movement after entry. This real-time data equips law enforcement with critical insights, improving response time and potentially saving lives.

Real-Time Communication with Staff

- Provides School Resource Officers and Administrators with the ability to communicate directly with staff during emergencies
- Enables targeted or building-wide instructions—such as when and where it’s safe to exit—ensuring informed, coordinated action when every second counts
